

SONER ERDEVİR

Mechanical Engineer | R&D, Design & Simulation

www.linkedin.com/in/soner-erdevir | sonererdevir@gmail.com | +90 544 123 01 19

PROFILE

A highly motivated, results-oriented, and distinguished Mechanical Engineer (Graduated 3rd of Class) with a strong foundation in mechanical design, structural analysis, and manufacturing. Demonstrated leadership excellence as a Team Leader for a TUSAŞ Lift Up R&D project and as Mechanical Division Captain in the TÜBİTAK Efficiency Challenge. Skilled in advanced CAD modeling, FEA simulations, mechanical testing, and cross-functional teamwork, with a proven track record of delivering innovative engineering solutions and sustainable mobility systems from concept to validation.

PROJECTS & ENGINEERING EXPERIENCE

Team Leader – TUSAŞ Lift Up Project

Composite Matrix Structure Supported Silicone Rubber Gasket Design and Test Validation | 2025 – June 2026

- Leading the design and test validation phases for a composite matrix structure supported silicone rubber gasket.
- Coordinating with academic advisors and team members to successfully meet project objectives and deadlines.

Mechanical Division Captain – YILKAT Electric Vehicle Team

TÜBİTAK Efficiency Challenge | 2024 – Present

- Led the design and manufacturing of mechanical systems (chassis, drivetrain, suspension) for a high-efficiency electric vehicle.
- Oversaw CAD modeling, FEA simulations, and physical assembly.
- Coordinated the mechanical team and ensured successful integration with electrical and control systems.

Mechanical Design Member – UMay Electromobile Team

TÜBİTAK Efficiency Challenge | 2023 – 2024

- Contributed to the aerodynamic shell design and carbon fiber body fabrication of a concept EV prototype.
- Collaborated on lightweight structural components and chassis integration.

Chassis Designer – WAST Electromobile Team

TÜBİTAK Efficiency Challenge | 2022 – 2023

- Designed and modeled the tubular frame and mounting system.
- Focused on safety, weight optimization, and durability in the early design phase.

WORK EXPERIENCE

Engineering Intern – Deico Engineering Inc.

Ankara, Turkey | Summer 2025

- Contributed to mechanical design and analysis tasks in engineering projects.
- Assisted in CAD modeling, structural evaluations, and prototype development.
- Gained hands-on experience with CNC machining processes and manufacturing workflows.

Laboratory Assistant – İŞKUR Youth Program

Akdeniz University Mechanical Laboratory | Feb 2025 – Jun 2025

- Assisted in the management, setup, and maintenance of laboratory equipment and experimental setups.
- Supported undergraduate students and faculty during practical laboratory sessions and hands-on engineering applications.
- Gained practical experience in testing, calibration, and workshop safety protocols.

Engineering Intern – Kristal Industry Inc.

Antalya, Turkey | Summer 2024

- Participated in mechanical production and quality control processes in a real manufacturing environment.
- Worked with technical documentation, CNC machining, and industrial assembly.
- Gained insights into lean manufacturing, workplace safety, and interdisciplinary communication on the shop floor.

EDUCATION

Akdeniz University – B.Sc. in Mechanical Engineering

Antalya, Turkey | Graduated 3rd in the Department: 2026

Berlitz Language Academy – Intensive English Training

Esas Sosyal “İngilizce Dil Fırsatım” Program

Istanbul, Turkey | May 2025 – March 2026

Ceyhan Eczacı Bahattin Sevinç Erdiñ Science High School

Adana, Turkey | Graduated: 2021

TECHNICAL SKILLS

- **CAD & Design:**SolidWorks, Creo, AutoCAD, Fusion 360
- **Simulation & Analysis:**ANSYS, SolidWorks Simulation
- **Programming & Software:**MATLAB, Python (basic), MS Office,Flutter
- **Manufacturing & Prototyping:** Composite fabrication, CNC familiarity, 3D printing
- **Project & Team Skills:**Leadership, report writing, multidisciplinary collaboration

LANGUAGES

Turkish:Native

English:B2
